### **35 Evaluation of Tenders**

35.1 The Procuring Entity shall use the criteria and methodologies listed in this ITT and Section III, Evaluation and Qualification Criteria. No other evaluation criteria or methodologies shall be permitted. By applying the criteria and methodologies, the Procuring Entity shall determine the Best Evaluated Tender. #### **Tenders Abnormally Low Tenders**

37.1 An Abnormally Low Tender is one where the Tender price, in combination with other elements of the Tender, appears so low that it raises material concerns as to the capability of the Tenderer in regards to the Tenderer's ability to perform the Contract for the offered Tender Price.

37.2 In the event of identification of a potentially Abnormally Low Tender, the Procuring Entity shall seek written clarifications from the Tenderer, including detailed price analyses of its Tender price in relation to the subject matter of the contract, scope, proposed methodology, schedule, allocation of risks and responsibilities and any other requirements of the Tender document.

37.3 After evaluation of the price analyses, in the event that the Procuring Entity determines that the Tenderer has failed to demonstrate its capability to perform the Contract for the offered Tender Price, the Procuring Entity shall reject the Tender.

## **Abnormally High Tenders**

- 37.4 An abnormally high price is one where the tender price, in combination with other constituent elements of the Tender, appears unreasonably too high to the extent that the Procuring Entity is concerned that it (the Procuring Entity) may not be getting value for money or it may be paying too high a price for the contract compared with market prices or that genuine competition between Tenderers is compromised.
- 37.5 In case of an abnormally high price, the Procuring Entity shall make a survey of the market prices, check if the estimated cost of the contract is correct and review the Tender Documents to check if he specifications, scope of work and conditions of contract are contributory to the abnormally high tenders. The Procuring Entity may also seek written clarification from the tenderer on the reason for the high tender price. The Procuring Entity shall proceed as follows:
- i) If the tender price is abnormally high based on wrong estimated cost of the contract, the Procuring Entity may accept or not accept the tender depending on the Procuring Entity's budget considerations.
  - ii) If specifications, scope of work and/or conditions of contract are contributory to the abnormally high tender prices, the Procuring Entity shall reject all tenders and may retender for the contract based on revised estimates, specifications, scope of work and conditions of contract, as the case may be.
- 37.6 If the Procuring Entity determines that the Tender Price is abnormally too high because genuine competition between tenderers is compromised (*often due to collusion, corruption or other manipulations*), the Procuring Entity shall reject all Tenders and shall institute or cause competent Government Agencies to institute an investigation on the cause of the compromise, before retendering.

## **38 Unbalanced and/or Front-Loaded Tenders**

- 38.1 If in the Procuring Entity's opinion, the Tender that is evaluated as the lowest evaluated price is seriously unbalanced and/or front loaded, the Procuring Entity may require the Tenderer to provide written clarifications. Clarifications may include detailed price analyses to demonstrate the consistency of the tender prices with the scope of works, proposed methodology, schedule and any other requirements of the Tender document.
- 38.2 After the evaluation of the information and detailed price analyses presented by the Tenderer, the Procuring Entity may as appropriate:
- a) Accept the Tender; or
  - b) require that the total amount of the Performance Security be increased at the expense of the Tenderer to a level not exceeding 10% of the Contract Price; or
  - c) agree on a payment mode that eliminates the inherent risk of the Procuring Entity paying too much for undelivered works; or
  - d) Reject the Tender.

## **39 Qualification of the Tenderer**

- 39.1 The Procuring Entity shall determine to its satisfaction whether the Tenderer that is selected as having submitted the lowest evaluated cost and substantially responsive Tender is eligible and meets the qualifying criteria specified in Section III, Evaluation and Qualification Criteria.
- 39.2 The determination shall be based upon an examination of the documentary evidence of the Tenderer's qualifications submitted by the Tenderer, pursuant to ITT 18. The determination shall not take into consideration the qualifications of other firms such as the Tenderer's subsidiaries, parent entities, affiliates, subcontractors or any other firm(s) different from the Tenderer that submitted the Tender.
- 39.3 An affirmative determination shall be a prerequisite for award of the Contract to the Tenderer. A negative determination shall result in disqualification of the Tender, in which event the Procuring Entity shall proceed to the Tenderer who offers a substantially responsive Tender with the next lowest evaluated cost to make a similar determination of that Tenderer's qualifications to perform satisfactorily.

## **40 Procuring Entity's Right to Accept Any Tender, and to Reject Any or All Tenders**

**B. Functional Specifications and Requirements: -**

Sr.No.	Description	Complied (Yes/No)
<b>Security Features</b>		
1.1	Access to applications / services must only be allowed from pre-authenticated and pre-authorized devices and users, using Zero Trust based software defined perimeter (SDP) security framework. The OEM Should be one of the authors of SDP Specifications.	
1.2	Authentication and authorization must happen on a separate channel before allowing user to connect to any service / applications - i.e. only authentication and authorization controls to communicate via a specific port or control channel. Solution should work & reach layer 7	
1.3	All authentication and authorization must happen over an encrypted channel and use mutual TLS to layer 7	
1.4	Contextual access control - Devices must be verified on various factors to arrive at a set trust level (e.g. between 0 to 10). Factors to arrive at a trust level will include the device holding a valid client certificate, belong to the organisation domain, is assigned to a particular user, has updated AV signatures, has run AV scan in the last 1 day, has the latest OS patches installed and any other specific criteria required by organisation.	
1.5	The solution must adopt the architecture of authenticate-first approach by securing every connection to a predetermined service, application or critical infrastructure. The primary effect will be that the solution allows good packets and connections while dropping bad packets and preventing bad connections. The solution should ensure, the application infrastructure is made effectively “black,” or undetectable, showing no domain name system (DNS) information or IP addresses.	
1.6	The Solution should protect critical assets/infrastructures by separating the access control and data planes to render them ‘black’ and blocking potential network-based attacks. The Gateway must employ Single Packet Authorization protocol (RFC 4226) with additional controls, like packets being signed using HMAC or certificates. Internet-scale deny-all, gateway applied to drop packets at switch speed.	
1.7	The Controller must employ Single Packet Authorization protocol with HMAC or certificates.	
1.8	The client to connect to the Controller using SPA (Single Packet Authorization) protocol followed by mutual TLS protocol to begin the device verification process followed by the user authentication process. The solution should Integrate device/user keys and tied to communication key.	
1.9	All users must be authenticated either locally by the Controller or via a 3rdparty authentication system such as AD, LDAP, RADIUS, SAML, 2FA providers etc. All user keys/tokens be paired with device key and then tied to communication key.	
1.1	Based on the authentication of the user and the trust level of the device, a final trust score must be assigned by the Controller to Step up authentication to Layer 7	
1.11	The Controller must check the available services to the user based on the final trust score and inform the endpoint / client on the available services.	
1.12	When a client initiates an access to the available service, the Controller to be notified first, and the Controller in turn to notify the Gateway to accept the connection from the client.	
1.13	The client to connect to the Gateway using Single Packet Authorization SPA protocol followed by mutual TLS protocol and if both SPA (Single Packet Authorization) and mutual TLS are successful, the Gateway accepts the connection and provides access to the application / service.	

1.14	Any endpoint device without the client software should not be able to connect to the Controller or the Gateway nor discover/scan the services/applications running behind the Gateway. The solution should ensure the Manager user/device key pair and tie it to communication key.	
1.15	Gateway to be invisible, Controller & Application to be blackened out without a valid client software and valid client certificate. This will protect against network attacks such as Denial of Service (DDoS), MITM and other such attacks (server attacks covered under OWASP Top 10)	
1.16	Solution should protect against lateral attacks by allowing only on-demand access to applications and not network access	
1.17	Solution should be able to prevent zero-day exploits

1.24	Solution should protect against Application-Layer Attack. Connection protected to Layer 7.	
1.25	Solution should protect against Identity Spoofing.	
1.26	Solution should protect against Web based attacks like SQL injection, broken authentication and session management. The solution should Integrate device key & multi-factor authentication along with Internet-scale deny all gateway.

Tenderers should note that only tenders that score 80% and above on the technical evaluation will qualify to have their financial bids evaluated.

Those scoring below 80% will not be evaluated further and will be disqualified. The following documents shall be confirmed to be duly filled:

- b) Price schedule

#### 3. **RECOMMENDATION FOR AWARD**

The technically responsive and lowest in cost bid shall be recommended for award of the contract

#### **Note:-**

The Parliamentary Joint Services may at its discretion visit the firms' client's premises or contact the references provided in confidence in order to establish or verify the correctness of details provided by the bidder.

#### **Tender Evaluation (ITT 35)**

**Price evaluation:** in addition to the criteria listed in ITT 35.2 (a)–(d) the following criteria shall apply:

- i) **Alternative Completion Times**
- ii) **Alternative Technical Solutions** Not applicable
- iii) **Other Criteria;** if permitted under ITT 35.2 (e)

#### **4 Multiple Contracts**

Multiple contracts will be permitted in accordance with ITT 35.4. Tenderers are evaluated on basis of Lots and the lowest evaluated tenderer identified for each Lot. The Procuring Entity will select one Option of the two Options listed below for award of Contracts.

#### **OPTION1**

- i) If a tenderer wins only one Lot, the tenderer will be awarded a contract for that Lot, provided the tenderer meets the Eligibility and Qualification Criteria for that Lot.

- ii) If a tenderer wins more than one Lot, the tender will be awarded contracts for all won Lots, provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the Lots. The tenderer will be awarded the combination of Lots for which the tenderer qualifies and the others will be considered for award to second lowest tenderers.

## **OPTION 2**

4.1 The Procuring Entity will consider all possible combinations of won Lots [contract(s)] and determine the combinations with the lowest evaluated price. Tenders will then be awarded to the Tenderer or Tenderers in the combinations provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the won Lots.

### **5 Alternative Tenders (ITT 15.1)**

*An alternative if permitted under ITT 13.1, will be evaluated as follows:*

The Procuring Entity shall consider Tenders offered for alternatives as specified in Part 2- Procuring Entity's requirements. Only the technical alternatives, if any, of the Tenderer with the Best Evaluated Tender conforming to the basic technical requirements shall be considered by the Procuring Entity.

### **6 MARGIN OF PREFERENCE**

**Apply Margin of Preference**, if so allowed to all evaluated and accepted tender as follows.

- 6.1 If the TDS so specifies, the Procuring Entity will grant a margin of preference of fifteen percent (15%) to be loaded on evaluated prices of foreign tenderers, where the percentage of shareholding of Kenyan citizens is less than fifty-one percent (51%).
  - 6.2 Contractors applying for such preference shall be asked to provide, as part of the data for qualification, such information, including details of ownership, as shall be required to determine whether, according to the classification established by the Procuring Entity, a particular contractor or group of contractor's qualifies for a margin of preference.
  - 6.3 After Tenders have been received and reviewed by the Procuring Entity, responsive Tenders shall be assessed to ascertain their percentage of shareholding of Kenyan citizens. Responsive tenders shall be classified into the following groups:
    - i) Group A: tenders offered by Kenyan Contractors and other Tenderers where Kenyan citizens hold shares of over fifty one percent (51%).
    - ii) Group B: tenders offered by foreign Contractors and other Tenderers where Kenyan citizens hold shares of less than fifty one percent (51%).
  - 6.4 All evaluated tenders in each group shall, as a first evaluation step, be compared to determine the lowest tender, and the lowest evaluated tender in each group shall be further compared with each other. If, as a result of this comparison, a tender from Group A is the lowest, it shall be selected for the award. If a tender from Group B is the lowest, an amount equal to the percentage indicated in Item 3.1 of the respective tender price, including unconditional discounts and excluding provisional sums and the cost of day works, if any, shall be added to the evaluated price offered in each tender from Group B. All tenders shall then be compared using new prices with added prices to Group B and the lowest evaluated tender from Group A. If the tender from Group A is still the lowest tender, it shall be selected for award. If not, the lowest evaluated tender from Group B based on the first evaluation price shall be selected.
- ### **7 Post qualification and Contract award (ITT 39), more specifically,**
- a) In case the tender was subject to post-qualification, the contract shall be awarded to the lowest evaluated tenderer, subject to confirmation of pre-qualification data, if so required.

## PERFORMANCE SPECIFICATIONS AND DRAWINGS

**(Describe Outputs and Performances, rather than Inputs, wherever**

**possible) Notes on Specifications**

A set of precise and clear specifications is a prerequisite for Tenderers to respond realistically and competitively to the requirements of the Procuring Entity without qualifying or conditioning their Tenders. In the context of international competitive Tendering, the specifications must be drafted to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of economy, efficiency, and fairness in procurement be realized, responsiveness of Tenders be ensured, and the subsequent task of Tender evaluation facilitated. The specifications should require that all goods and materials to be incorporated in the Services be new, unused, of the most recent or current models, and incorporate all recent improvements in design and materials unless provided otherwise in the Contract.

Samples of specifications from previous similar projects in the same country are useful in this respect. The use of metric units is encouraged. Most specifications are normally written specially by the Procuring Entity to suit the Contract in hand. There is no standard set of Specifications for universal application in all sectors in all countries, but there are established principles and practices, which are reflected in this document

There are considerable advantages in standardizing General Specifications for repetitive Services in recognized public sectors, such as education, health, sanitation, social and urban housing, roads, ports, railways, irrigation, and water supply, in the same country or region where similar conditions prevail. The General Specifications should cover all classes of workmanship, materials, and equipment commonly involved in the provision of Services, although not necessarily to be used in a particular Services Contract. Deletions or addenda should then adapt the General Specifications to the particular Services.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for goods, materials, Services, and workmanship, recognized international standards should be used as much as possible. Where other particular standards are used, whether national standards of Kenya or other standards, the specifications should state that goods, materials, Services and workmanship that meet other authoritative standards, and which ensure substantially equal or higher quality than the standards mentioned, will also be acceptable.

*If technical alternatives for parts of the Services are permitted in the tendering document, these parts shall be described in this Section.*

*These Notes for Preparing Specifications are intended only as information for the Procuring Entity or the person drafting the tendering document.*

$$P_c = A_c + B_c L_{mc} / L_{oc} + C_c I_{mc} / I_{oc}$$

Where:

$P_c$  is the adjustment factor for the portion of the Contract Price payable in a specific currency “c”.

$A_c$ ,  $B_c$  and  $C_c$  are coefficients specified in the **SCC**, representing:  $A_c$  the non-adjustable portion;  $B_c$  the adjustable portion relative to labor costs and  $C_c$  the adjustable portion for other inputs, of the Contract Price payable in that specific currency “c”; and

$L_{mc}$  is the index prevailing at the first day of the month of the corresponding invoiced ate and  $L_{oc}$  is the index prevailing 28 days before Tender opening for labor; both in the specific currency “c”.

$I_{mc}$  is the index prevailing at the first day of the month of the corresponding invoice date and  $I_{oc}$  is the index prevailing 28 days before Tender opening for other inputs payable; both in the specific currency “c”.

If a price adjustment factor is applied to payments made in a currency other than the currency of the source of the index for a particular indexed input, a correction factor  $Z_o/Z_n$  will be applied to the respective component factor of  $p_n$  for the formula of the relevant currency.  $Z_o$  is the number of units of Kenya Shillings of the index, equivalent to one unit of the currency payment on the date of the base index, and  $Z_n$  is the corresponding number of such currency units on the date of the current index.

6.6.2 If the value of the index is changed after it has been used in a calculation, the calculation shall be corrected and an adjustment made in the next payment certificate. The index value shall be deemed to take account to fall changes in cost due to fluctuations in costs.
